

We want you to view
healthcare differently.

3fivetwoTM
HEALTHCARE

Keeping you on top of your game...

It's been a well-known fact that for a number of reasons, men are often much more reluctant than women to go to the doctor for regular check ups. At 3fivetwo we want to encourage men to take responsibility for their own health by providing a complete health assessment package all under one roof making the process of looking after your health and wellbeing as easy as possible.

The Men's Health service at 3fivetwo includes a general health assessment or screening for specific key regions such as our Healthy Heart Assessment or Bowel Screening. These services are available in isolation or as a mix and match combined package.

Plus with the incorporation of Belfast Prostate Clinic, which focuses on Prostate Cancer Screening and Benign and Malignant treatments of the Prostate, the clinic also provides an ideal "One-Stop" solution to screening for Prostate cancer. Run by a team of leading urologists in Northern Ireland, our men's health service offers the most complete range of services in Northern Ireland dedicated to total prostate health.

Benign prostate disease is common in men over the age of 50. It is normal for the prostate to enlarge with age due to growth of benign tumours within the gland. These tumours are not life threatening but excessive growth can cause restriction around the urethra resulting in urinary complaints and quality of life issues.

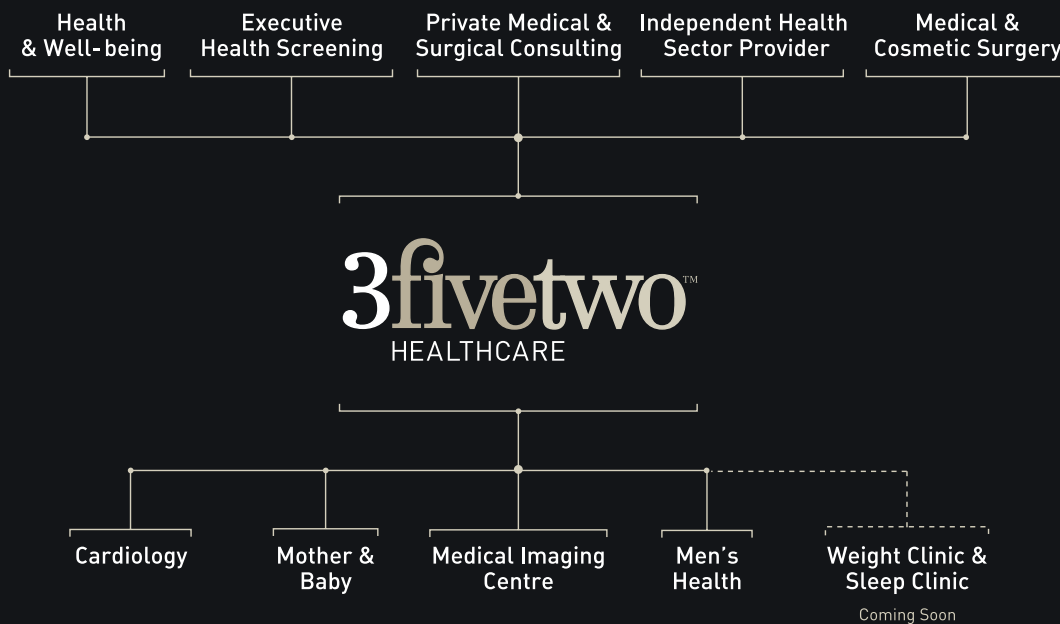

Prostate cancer is relatively common above the age of 70 affecting up to 1 in 3 men. Medical decisions on treatment options depend on many factors including the patient's age, general health, severity of symptoms and patient preference.

The service includes:

- Specialist consultation and risk assessment
- Prostate examination
- Urinalysis
- Urinary flow rate studies
- Post-void ultrasound
- PSA blood test
- Prostate biopsy (if clinically indicated)

Across all three of our clinics you will encounter the same open, understanding and knowledgeable service.
